

QUALITY ASSURANCE POLICY STATEMENT

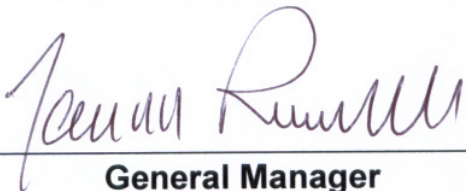

Rolled Alloys is committed to provide customers with high quality products in compliance with contractual requirements.

The goal of the Quality Assurance System is to develop, implement, monitor and continually improve the systems and procedures necessary to ensure our commitment to quality is achieved. The aim is to establish, measure and monitor the Quality objectives. These objectives, which are defined and agreed by senior management, offer the tools to allow continuous improvement of internal business processes. These will be regularly reviewed at management meetings.

The Rolled Alloys' Quality Assurance System has been developed to be in compliance with the International Standard ISO 9001/2008, AS9120 & AS9100. Rev B & ISO/TS29001.

Rolled Alloys is a supplier of specialty metals to a wide variety of end use applications. Rolled Alloys does not perform any forming, fabrication or machining operations. These or similar functions may be performed by approved sub-contractors.

The International Manager, Quality and continuous improvement has full authority for the administration and management of this system. This Quality Assurance System has the complete support and commitment of the management and employees of Rolled Alloys.
